Server & Containerization: Docker

Project Management: Team Meetings, Project Planning & Analysis, User Specification Documentation, Client Requirement Gathering

Project Management Tools: Zoho, Teamwork, ClickUp

PROFESSIONAL EXPERIENCE

WordPress Developer | August Infotech, Surat

1 July 2022 – Present

- Delivered 10+ custom CMS WordPress projects using Gutenberg blocks, ACF, custom themes/plugins, and extensive use of WordPress core functions and hooks for dynamic functionality.
- Built scalable CMS solutions using PHP/WordPress by integrating third-party APIs, payment gateways, and Google reCAPTCHA for enhanced form security.
- Configured automated CI/CD pipelines using GitHub Actions for smooth testing and deployment processes.
- Participated in Git-based workflows with Pull Requests, code reviews, and continuous integration pipelines (CI/CD via GitHub Actions).
- Collaborated with team members to deliver weekly demos, maintain functional documentation, and contribute to technical architecture planning within Agile Scrum sprints.
- Mentored and supported new team members and interns on WordPress development practices and coding standards.
- Leveraged AI-assisted tools such as GitHub Copilot, ChatGPT, and Claude AI to accelerate development and boost productivity, delivering high-quality client projects within tight deadlines.

Internship | August Infotech, Surat

3 January 2022 – 1 July 2022

- Acquired foundational skills in PHP, WordPress, HTML, CSS, and JavaScript while strengthening core web development practices.
- Gained hands-on understanding of object-oriented programming (OOP) concepts and applied them in real-world development tasks.
- Actively contributed to a live client project, collaborating with the development team in a production environment.
- Followed best practices in coding, testing, and debugging, with exposure to Agile methodologies and version control systems.

PROJECTS

Custom Payment Link Plugin (WooCommerce)

Built a custom WordPress plugin generating **secure, single-use payment links** using **UUID-based tokens with expiring transients**, with dynamic price injection into WooCommerce checkout via custom hooks and **APCO Pay gateway integration**.

Grantee Map — Geolocation & Pin Clustering

Implemented **per-record geocoding and automatic pin clustering** on an interactive map, adding lat/long fields to custom post types and click-to-expand clustered pins.

Mozilla Firefox

Built a WordPress theme using **BarbaJS for page transitions**, custom WPForm configuration, and animations.

Building Survey Quotes.co.uk • building-survey-quotes.co.uk

Led a website revamp using **custom Gutenberg blocks (JSON format)** and **ACF-powered theme components**, with a focus on performance optimization.

Building Survey Quotes.co.uk – Multi-Step Form Plugin

Built a **custom multi-step form plugin** with an admin options page and a **shortcode system for frontend embedding**, plus dedicated settings modules for consent, values, mail, and styling.

Nouv • [Nouv.com](https://nouv.com)

Built **custom Gutenberg blocks, ACF integrations, and WooCommerce store setup**, including a Bootstrap slider and custom Filter Services functionality.

August Infotech Website • augustinfotech.com

Built **AJAX-based blog PDF generation** and a **Dropbox API connection for automated file uploads** via Contact Form 7, plus custom Gutenberg/ACF theme features and SEO optimization.

Trans Justice Funding Project • transjusticefundingproject.org

Built custom Gutenberg blocks and ACF theme features, adding **WPML multilingual support** and deploying via **Docker**.

EDUCATION

Master of Computer Application (MCA) | GTU, Gujarat, India

Apr 2022

Bachelor of Computer Application (BCA) | VNSGU, Gujarat, India

Apr 2020
